

MAKER JOURNAL

Name: _____

Date: _____

Unit: Animal Responses to Information

Lesson 1: The World According to Animals

List the different types of sensory receptors animals may have, and then enter the stimulus for each receptor in the table.

Sensory Receptors	Stimulus
<i>Example: Ears</i>	<i>Sound</i>

Choose one animal you learned about in the lesson videos. Select one sensory receptor on the animal and discuss, brainstorm, and record ideas in the box below for how that sensory receptor helps the animal survive in its environment.

Sensory Receptor Brainstorm and Discussion (be ready to share your ideas!)

Example: Cat → Whiskers - Help cats detect the size, location, and texture of object, even in the dark; detects approaching predators via air currents brushing passed them
