Please circle ALL THE WORDS that describe the activity you just did:

Fun	Asking Questions	Boring
Creative	Like	Solving Problems
Dislike	Hard	I'm good at it
Easy	Thinking	Learning

- 1) Which track configuration from point A to point B has a slope of  $1 \frac{2}{3}$  ?

**Please turn the page.**

- 2) The entire length of a toy roller coaster track from the start, through one loop, and to the end of the track is 30 cm. A roller coaster takes 6 seconds to travel from the beginning to the end of the track. What is the average speed of the coaster?

- a) 18 cm/sec
- b) 3 cm/sec
- c) 5 cm/sec
- d) 2 cm/sec

- 3) A test is made to find the average speed of three trials of a roller coaster down the same track. Each trial results in the following findings:

Trial number	Speed of the coaster
1	14.5cm/sec
2	12.8 cm/sec
3	13.5 cm/sec

Which answer below shows the average speeds of all three trials?

- a) 13.6 cm/sec
- b) 40.8 cm/sec
- c) 14 cm/sec
- d) 13.2 cm/sec
