SAMPLING BIODIVERSITY: SPECIES RICHNESS

Data Table: Species Richness

Sample Number	Quadrat Number	Species Count	Cumulative Total (Species)
Example 1	26	4	**4**
Example 2	33	3	4+3=**7**

SAMPLING BIODIVERSITY: SPECIES EVENNESS

Data Table: Species Richness

Species Name	# Individuals	% Species = (# Individuals / Total # Individuals) x 100
Example: Yellow bead	50	% = (50 / 300) x 100 = 17 %
Example: Green bead	140	% = (140 / 300) x 100 = 47 %
	(Example: 300)	
TOTAL # INDIVIDUALS =
